

THE RÉSUMÉ OF DANIEL B. SCHMIEDELER

PROFILE

I have over twenty years of experience in the computer industry, and over 4 years of administrative management. I'm a diligent worker, and a good collaborator. I like solving problems, and view them as challenges instead of nuisances. I consider myself a creative and affable guy.

Autodesk Fusion 360
Adobe Creative Suite
Adobe ColdFusion
Microsoft Office
Visual Basic Script
Windows
Computer and A/V Hardware
T-SQL
HTML / CSS
PHP
JavaScript
General Computer Wizardry

WORK EXPERIENCE

JUL 2018 - FEB 2023 / APPRAISAL SERVICES MANAGER / MILLER SAMUEL, INC.

Established in 1986, Miller Samuel is an independently owned and operated firm that provides appraisal and consulting services on property in New York City as well as Westchester County, Fairfield County, Long Island, The Hamptons, and North Fork.

While there, I served as an appraisal services manager -- overseeing the preliminary gathering of information for new reports, preparing inspection site paperwork, acting as a liaison between the clients and the appraisers, and providing internal technical support for the whole office. I also oversaw the much-needed transition from being a paper-based workplace to that of a digital one during the early months of the pandemic. It was enjoyable work that I excelled at, and I was fortunate enough to have been part of a great team of incredibly skilled and competent people.

APR 2001 - APR 2018 / DATABASE AND WEB DEVELOPER / THINKWELL, INC.

Thinkwell is an e-learning company specializing in the on-line delivery of videos and coursework, for students of all ages, in the subjects of math, science, and social science.

During my 17-year tenure at Thinkwell, I served as a designer and developer of the company's e-learning website, using such technologies as T-SQL, ColdFusion, HTML, CSS and JavaScript. I also designed and developed many tools used internally by the company's accounting, art, editorial, and sales departments. Working closely and daily with my coworkers to understand and deliver upon their needs was what I genuinely enjoyed most about the job.

DESIRED EXPERIENCE

Despite over two decades of experience, my passion for web development and interest in real estate has waned. I am looking to move into a new career, ideally starting in the role of an apprentice or assistant, within a field and/or company that is more suited to my interests.

I am quite skilled with computers, and I enjoy working closely with others. I am extremely organized, and I do not find repetitive tasks mundane. I learn quickly, and pride myself on rapid and accurate work. I get along great and work well as a team member, but I also still get the job done when working independently.

In terms of potential areas I envision myself working in, my interests cover a large spectrum. I enjoy work that requires a great amount of precision, so the fields of manufacturing, science, architecture, and engineering are the most desirous for me. I would love to work in a researching capacity, and I know that I would excel as a research assistant or perhaps a laboratory aide. 3D modeling, 3D printing, Arduino, and electronics are all passions of mine.

Given that these are uncharted waters for me professionally, my role and salary expectations are modest. I am simply searching for opportunities that will to give me a chance at something new, and I can say with conviction that neither myself nor my performance will disappoint.
